

Mytholmroyd Flood Alleviation Scheme

The Environment Agency are working in partnership with Calderdale Council and VBA to deliver the Mytholmroyd Flood Alleviation Scheme

Information Bulletin No. 9 – July 2018

Greenhill Industrial Estate

The Calderdale Flood Project Board has approved plans to continue to progress with the construction of flood walls at Greenhill Industrial Estate. For more information our 'keeping you informed' bulletin can be found on eyeoncalderdale.com under the 'flood works' section.

Public Conveniences

The toilet block in the centre of the village is now closed. We are working with Calderdale Council as part of a wider scheme of improvement works which will involve landscaping the area with paving, benches, plants and glass panelled walls. If you have any questions about the plans please email business@calderdale.gov.uk

VBA has been working with the local cubs group as part of their Environmental Conservation Badge. For more information and to see who won the poster competition, visit eyeoncalderdale.com 'flood works'.

Our cupcake day in support of Alzheimer's Society, raised a fantastic £120. Thanks to everyone who contributed and participated to raise money for this worthy cause!

CONSTRUCTION UPDATE

Area C – Mytholmroyd Bridge & St Michaels Church

We are currently using the site of the old Post Office building to deliver sheet piles across the river to the church for the piling works. At the same time, we are ensuring the existing channel wall is repaired and making the area ready for the new walls to be placed.

Area E – Caldene Bridge

Yorkshire Water is the last service provider working in Caldene Avenue. They are currently working on the foul and clean water diversions. We are also finishing the piling platform next to the river ready for the piling to commence next week for the central pier of the new bridge. Increased noise and vibration is expected during these works, however they will be monitored as the works progress.

Area H – White Lee Clough Culvert

We are improving the two trash screens at the top of White Lee Clough. Work is underway to remove the existing screens and begin inspections of the culvert under Midgley Road. There will be ongoing construction work to facilitate the new screens being installed.

Cragg Brook

The works at Streamside / Elphaborough have been affected by unforeseen ground conditions associated with the new foundations for the foot bridge. We have exposed an uncharted service that has prevented the works in this area progressing. Once the service is identified, work will then recommence.

Contact us!

If you have any concerns or questions please come and talk to a member of the team at the Red Acre Site. Alternatively, you can contact us by email - mytholmroydFAS@environment-agency.gov.uk Look out for news updates on Twitter by following [@EnvAgencyYNE](https://twitter.com/EnvAgencyYNE) and at www.eyeoncalderdale.com.
